FULL PAPERS

PAGE

Biosynthesis and Degradation

Polyamines and their biosynthetic decarboxylases in various tissues of the young rat during recovery from undernutrition.
By P. A. McAnulty & J. P. G. Williams 109

Studies on the biosynthesis, assembly and secretion of vitellogenin, an oestrogen-induced multicomponent protein.
By T. M. Penning, A. H. Merry, K. A. Munday & M. Akhtar 157

Bioenergetics

Substrate specificity of amino acid transport in sheep erythrocytes.
By J. D. Young & J. C. Ellory 33

Mitochondrial adenosine triphosphatase of the fission yeast, *Schizosaccharomyces pombe* 972h⁻. Changes in activity and oligomycin-sensitivity during the cell cycle of catabolite-repressed and -de-repressed cells.
By S. W. Edwards & D. Lloyd 39

An oligomycin-resistant adenosine triphosphatase and its effects on cellular growth, mitochondrial oxidative phosphorylation and respiratory proton translocation in *Saccharomyces cerevisiae*.
By M. Somlo, R. A. Reid & M. Krupa 51

The oxidation–reduction potential of the reaction-centre chlorophyll (P700) in Photosystem I. Evidence for multiple components in electron-paramagnetic-resonance signal 1 at low temperature.
By M. C. W. Evans, C. K. Sihra & A. R. Slabas 75

Proton uptake linked to the 3-deoxy-2-oxo-D-gluconate-transport system of *Escherichia coli*.
By A. E. Lagarde & B. A. Haddock 183

Cellular Interactions and Control Processes

Effects of prostaglandin on substrate uptake and cell division in human diploid fibroblasts.
By P. Polgar & L. Taylor 1

Alloxan cytotoxicity *in vitro*. Inhibition of rubidium ion pumping in pancreatic β-cells.
By L.-Å. Idahl, Å. Lernmark, J. Sehlin & I.-B. Täljedal 9

PAGE

Alloxan cytotoxicity *in vitro*. Microscope photometric analyses of Trypan Blue uptake by pancreatic islet cells in suspension.
By K. Grankvist, Å. Lernmark & I.-B. Täljedal 19

Factors controlling the activities of phosphatidate phosphohydrolase and phosphatidate cytidylyltransferase. The effects of chlorpromazine, demethylimipramine, cinchocaine, norfenfluramine, mepyramine and magnesium ions.
By R. G. Sturton & D. N. Brindley 25

Inhibition of lipogenesis by halothane in isolated rat liver cells.
By J. P. Mapes 47

Acetylcholine increases the breakdown of triphosphoinositide of rabbit iris muscle prelabelled with [^{32}P]phosphate.
By A. A. Abdel-Latif, R. A. Akhtar & J. N. Hawthorne 61

Deoxyribonucleic acid and polyamine synthesis in rat ventral prostate. Effects of age of the intact rat and androgen stimulation of the castrated rat with testosterone, 5α-dihydrotestosterone and 5α-androstane-3β,17β-diol.
By E. E. K. Takyi, D. J. M. Fuller, L. J. Donaldson & G. H. Thomas 87

Studies on sex-organ development. The hormonal regulation of steroidogenesis and adenosine 3′:5′-cyclic monophosphate in embryonic-chick ovary.
By C. T. Teng & C. S. Teng 123

Hormonal and ionic control of the glycogenolytic cascade in rat liver.
By G. van de Werve, L. Hue & H.-G. Hers 135

The effect of insulin on the glycogenolytic cascade and on the activity of glycogen synthase in the liver of anaesthetized rabbits.
By G. van de Werve, W. Stalmans & H.-G. Hers 143

Factors influencing the activity of ornithine aminotransferase in isolated rat liver mitochondria.
By J. D. McGivan, N. M. Bradford & A. D. Beavis 147

Phosphorylation of rat thymus histones, its control and the effects thereon of γ-irradiation.
By A. Fónagy, M. G. Ord & L. A. Stocken 171

PAGE

Metabolism in Whole Organisms

The metabolism of benzyl isothiocyanate and its cysteine conjugate.
By G. Brüsewitz, B. D. Cameron, L. F. Chasseaud, K. Görler, D. R. Hawkins, H. Koch & W. H. Mennicke 99

RAPID PAPERS

PAGE

Biosynthesis and Degradation

Age-related changes in protein turnover and ribonucleic acid of the diaphragm muscle of normal and dystrophic hamsters.
By D. F. Goldspink & G. Goldspink 191

Inhibition of haem synthesis caused by cobalt in rat liver. Evidence for two different sites of action.
By F. De Matteis & A. H. Gibbs 213

Bioenergetics

The effects of bathophenanthroline, bathophenanthrolinesulphonate and 2-thenoyltrifluoroacetone on mung-bean mitochondria and submitochondrial particles.
By P. R. Rich, A. L. Moore & W. D. Bonner, Jr. 205

PAGE

Subcellular Structures

Collagenase is a component of the specific granules of human neutrophil leucocytes.
By G. Murphy, J. J. Reynolds, U. Bretz & M. Baggiolini 195

The phosphorylation of an acidic protein of the large ribosomal subunit of Krebs II ascites cells.
By D. P. Leader & A. A. Coia 199

Cellular Interactions and Control Processes

The turnover of hamster fibroblast lysosomal β-D-glucuronidase.
By M. J. Warburton & C. H. Wynn 201

Metabolism in Whole Organisms

The effects of inhibition of gluconeogenesis in suckling newborn rats.
By P. Ferre, J.-P. Pegorier & J. Girard 209

Contents of Volume 162, No. 2

FULL PAPERS

PAGE

Biosynthesis and Degradation

The effect of β-D-xylosides on chondroitin sulphate biosynthesis in embryonic chicken cartilage in the absence of protein synthesis inhibitors.
By K. D. Gibson, B. J. Segen & T. K. Audhya 217

A phosphodiesterase in rat kidney cortex that hydrolyses glycerylphosphorylinositol.
By R. M. C. Dawson & N. Hemington 241

Labelling studies *in vivo* on the metabolism of the acyl and glycerol moieties of the glycerolipids in the developing maize leaf.
By C. R. Slack, P. G. Roughan & N. Balasingham 289

The formation of menaquinone-4 (vitamin K) and its oxide in some marine invertebrates.
By V. T. Burt, E. Bee & J. F. Pennock 297

PAGE

Measurement of the absolute rates of cholesterol biosynthesis in isolated rat liver cells.
By G. F. Gibbons & C. R. Pullinger 321

Occurrence of ornithine decarboxylase and polyamines in cartilage.
By P. D. Conroy, D. M. Simms & J. J. Pointon 347

Bioenergetics

Transport of galactose, glucose and their molecular analogues by *Escherichia coli* K12.
By P. J. F. Henderson, R. A. Giddens & M. C. Jones-Mortimer 309

The adenosine triphosphatase-inhibitor content of bovine heart submitochondrial particles. Influence of the inhibitor on adenosine triphosphate-dependent reactions.
By S. J. Ferguson, D. A. Harris & G. K. Radda 351

GENERAL BOOKBINDING CO.
77 313AA 2 013 1 C 2362
QUALITY CONTROL MARK

PAGE

Subcellular Structures

Protein determinants of myelination in different regions of developing rat central nervous system.
By N. L. Banik & M. E. Smith 247

Intramitochondrial localization of the 4-aminobutyrate–2-oxoglutarate transaminase from ox brain.
By I. Schousboe, B. Bro & A. Schousboe 303

Binding of magnesium ions to cell walls of *Bacillus subtilis* W23 containing teichoic acid or teichuronic acid.
By J. E. Heckels, P. A. Lambert & J. Baddiley 359

Cellular Interactions and Control Processes

Modification of erythrocyte membranes by a purified phosphatidylinositol-specific phospholipase C (*Staphylococcus aureus*).
By M. G. Low & J. B. Finean 235

Compartmentation of free amino acids for protein biosynthesis. Influence of diurnal changes in hepatic amino acid concentrations on the composition of the precursor pool charging aminoacyl-transfer ribonucleic acid.
By A. Vidrich, J. Airhart, M. K. Bruno & E. A. Khairallah 257

Comparative study of nuclear binding sites for oestradiol in rat testicular and uterine tissue. Determination of low amounts of specific binding sites by an [^{3}H]oestradiol-exchange method.
By W. de Boer, J. de Vries, E. Mulder & H. J. van der Molen 331

Specific protein synthesis in isolated rat testis Leydig cells. Influence of luteinizing hormone and cycloheximide.
By F. H. A. Janszen, B. A. Cooke & H. J. van der Molen 341

Effects of anti-microtubular agents and cycloheximide on the metabolism of chylomicron cholesteryl esters by hepatocyte suspensions.
By Å. Nilsson 367

Effect of thyroliberin on the concentration of adenosine 3′:5′-phosphate and on the activity of adenosine 3′:5′-phosphate-dependent protein kinase in prolactin-producing cells in culture.
By K. M. Gautvik, E. Walaas & O. Walaas 379

PAGE

The release of alanine by rat diaphragm muscle *in vitro*.
By K. Snell & D. A. Duff 399

Surface components involved in virally mediated membrane changes.
By K. J. Micklem & C. A. Paternak 405

The substrate specificity of adenosine 3′:5′-cyclic monophosphate-dependent protein kinase of rabbit skeletal muscle.
By S. J. Yeaman, P. Cohen, D. C. Watson & G. H. Dixon 411

Comparison of the substrate specificities of protein phosphatases involved in the regulation of glycogen metabolism in rabbit skeletal muscle.
By J. F. Antoniw, H. G. Nimmo, S. J. Yeaman & P. Cohen 423

Specificity of a protein phosphatase inhibitor from rabbit skeletal muscle.
By P. Cohen, G. A. Nimmo & J. F. Antoniw 435

Co-ordinate changes in enzymes of fatty acid synthesis, activation and esterification in rabbit mammary gland during pregnancy and lactation.
By V. J. Short, D. N. Brindley & R. Dils 445

Development

Changes in enzymic activities of nucleoside diphosphate sugar interconversions during differentiation of cambium to xylem in sycamore and poplar.
By G. Dalessandro & D. H. Northcote 267

Changes in enzymic activities of nucleoside diphosphate sugar interconversions during differentiation of cambium to xylem in pine and fir.
By G. Dalessandro & D. H. Northcote 281

Metabolism in Whole Organisms

Microbiological degradation of bile acids. Further degradation of a cholic acid metabolite containing the hexahydroindane nucleus by *Corynebacterium equi*.
By S. Hayakawa & T. Fujiwara 387

RAPID PAPERS

PAGE

Biosynthesis and Degradation

Long-chain acyl-coenzyme A synthetase activity of spinach chloroplasts is concentrated in the envelope.
By P. G. Roughan & C. R. Slack 457

Cellular Interactions and Control Processes

Re-evaluation of amino-oxyacetate as an inhibitor.
By S. B. Smith, S. Briggs, K. C. Triebwasser & R. A. Freedland 453

PAGE

Development

Changes in protein kinase activity in rat testes during development.
By E. A. Bernard & G. F. Wassermann 465

Prenatal induction of sucrase activity in rat jejunum.
By P. Celano, J. Jumawan, C. Horowitz, H. Lau & O. Koldovsky 469

Metabolism in Whole Organisms

Lipoprotein lipase activity at onset of development of white adipose tissue in newborn rats.
By É. Péquignot-Planche, P. de Gasquet, A. Boulangé & N. T. Tonnu 461

Contents of Volume 162, No. 3

FULL PAPERS

PAGE

Biosynthesis and Degradation

Studies on the cell-free biosynthesis of β-lactam antibiotics.
By P. E. Bost & A. L. Demain 681

Bioenergetics

Studies of energy-linked reactions. Localization of the site of action of trialkyltin in yeast mitochondria.
By K. Cain & D. E. Griffiths 575

Mitochondrial adenosine triphosphatase of the fission yeast *Schizosaccharomyces pombe* 972h$^-$. Changes in inhibitor sensitivities during the cell cycle indicate similarities and differences in binding sites.
By D. Lloyd & S. W. Edwards 581

The absorption of protons with α-methyl glucoside and α-thioethyl glucoside by the yeast N.C.Y.C. 240. Evidence against the phosphorylation hypothesis.
By R. Brocklehurst, D. Gardner & A. A. Eddy 591

Partial diploids of *Escherichia coli* carrying normal and mutant alleles affecting oxidative phosphorylation.
By F. Gibson, G. B. Cox, J. A. Downie & J. Radik 665

PAGE

Subcellular Structures

Ribonucleic acid stimulation of mammalian liver nuclear-envelope nucleoside triphosphatase. A possible enzymic marker for the nuclear envelope.
By P. S. Agutter, J. R. Harris & I. Stevenson 671

Cellular Interactions and Control Processes

Adenylate cyclase activity in lymphocyte subcellular fractions. Characterization of non-nuclear adenylate cyclase.
By D. E. Snider, Jr. & C. W. Parker 473

Adenylate cyclase activity in lymphocyte subcellular fractions. Characterization of a nuclear adenylate cyclase.
By H. J. Wedner & C. W. Parker 483

Nature of the stimulation of biogenesis of cholesterol in the liver by noradrenaline.
By R. George & T. Ramasarma 493

Regulation of mammalian protein synthesis *in vivo*. Stimulated protein synthesis in liver *in vivo* after cycloheximide treatment.
By J. J. Ch'ih, R. Procyk & T. M. Devlin 501

Properties of glutathione release observed during reduction of organic hydroperoxide, demethylation of aminopyrine and oxidation of some substances in perfused rat liver, and their implications for the physiological function of catalase.
By N. Oshino & B. Chance 509

PAGE

The effects of hyperphenylalaninaemia on the concentrations of aminoacyl-transfer ribonucleic acid *in vivo*. A mechanism for the inhibition of neural protein synthesis by phenylalanine.
By J. V. Hughes & T. C. Johnson 527

Effects of adenosine 3′:5′-cyclic monophosphate and serum on synthesis of hyaluronic acid in confluent rat fibroblasts.
By M. Tomida, H. Koyama & T. Ono 539

Steroid glucuronyltransferases of rat liver. Properties of oestrone and testosterone glucuronyltransferases and the effect of ovariectomy, castration and administration of steroids on the enzymes.
By G. S. Rao, G. Haueter, M. L. Rao & H. Breuer 545

Effect of acetoacetate on glucose metabolism in the soleus and extensor digitorum longus muscles of the rat.
By E. Z. Maizels, N. B. Ruderman, M. N. Goodman & D. Lau 557

Effects of glucose, glucose metabolites and calcium ions on adenylate cyclase activity in homogenates of mouse pancreatic islets.
By K. Capito & C. J. Hedeskov 569

The mechanism of adenosine triphosphate depletion in the liver after a load of fructose. A kinetic study of liver adenylate deaminase.
By G. Van den Berghe, M. Bronfman, R. Vanneste & H.-G. Hers 601

PAGE

A kinetic study of the soluble 5′-nucleotidase of rat liver.
By G. Van den Berghe, C. van Pottelsberghe & H.-G. Hers 611

Changes in mammary-gland acetyl-coenzyme A carboxylase associated with lactogenic differentiation.
By J. C. Mackall & M. D. Lane 635

Binding of bile acids by 100000*g* supernatants from rat liver.
By R. C. Strange, I. A. Nimmo & I. W. Percy-Robb 659

Development

Metabolism of glucose, fructose and lactate *in vivo* in chronically cannulated foetuses and in suckling lambs.
By D. M. Warnes, R. F. Seamark & F. J. Ballard 617

The appearance of gluconeogenesis at birth in sheep. Activation of the pathway associated with blood oxygenation.
By D. M. Warnes, R. F. Seamark & F. J. Ballard 627

Metabolism in Whole Organisms

Rates of glucose utilization and glucogenesis in rats in the basal state induced by halothane anaesthesia.
By D. F. Heath, K. N. Frayn & J. G. Rose 643

Glucose turnover in the post-absorptive rat and the effects of halothane anaesthesia.
By D. F. Heath, K. N. Frayn & J. G. Rose 653
